Der Preis den wir zahlen: Performance und HA mit Data Guard

Martin Klier

Performing Databases GmbH
Mitterteich / Germany

mit Axel vom Stein, BSS Bohnenberg, Solingen

Speaker

- Martin Klier
- Solution Architect and Database Expert
- My focus:
 - Performance + Tuning
 - Highly available systems
 - Cluster and Replication
- Linux since 1997
- Oracle Database since 2003

ORACLE®
ACE Director

Performing Databases

- Three Experts for Database technology
 - Concepts and Project Competence
 - Architecture- and System planning
 - Licensing
 - Implementation and Troubleshooting
- Get in touch
 - Performing Databases GmbH
Wiesauer Strasse 27
95666 Mitterteich // Germany
 - <http://www.performing-databases.com>
 - Twitter: @PerformingDB

- **Technischer Projektleiter, Leitung Datentechnik (> 20 Jahre BSS Bohnenberg GmbH)**

- **Oracle:**

- **seit 2001**
- **zunächst als Entwickler (PL/SQL, C, C#)**
- **dann mehr und mehr Richtung DBA**

- **Schwerpunkte/Fables:**

- **Ausbildung**
- **Sicherheits- und HA - Konzepte**
- **Migrationsprojekte**
- **Standardisierung**
- **alles was sich automatisieren lässt**

- **Entwurf und Feinplanung von intralogistischen Systemen und Anlagen**
- **schlüsselfertiger Abwicklung als GU**
- **Flowpicker (Hochleistungskommissionierung)**
- **Hochregal- und Kleinteilelagern**
- **fahrerlosen Transportsystemen**
- **Lagerverwaltungssystemen**
- **Materialflussrechnern**
- **Pick-by-Light / Pick-by-Voice**
- **Staplerleitsystemen**
- **Visualisierungen**
- **SPS – Technik**
- **etc.**

Promises and Compromises

Promises vs. Compromises

vs.

Nota Bene: A.C.I.D. – a promise!

Data Guard = Stretched ACID

Infrastructure for our Tests

Test Gear, Hyperconverged

2x HP ProLiant DL385 Gen10 + 1 witness on old HW
each 1x AMD EPYC 7402 24-Core Processor
each 16 physical disks @ 10k rpm
NO flash cache ☹️
4x 1Gbit Trunk Network

VMware vSphere 7.0.1
vSAN 7

Test Gear, Hyperconverged

Test Gear, ASM

Test Gear

Pluggable, Data Guard

Performance Baselines

dd IO Baseline

= Multiblock IO

IO Size = DB_FILE_MULTIBLOCK_READ_COUNT * DB_BLOCK_SIZE

IO Size = 128 * 8k = 1024k

Input	Output	IO Size	MB/s
/dev/zero	/dev/BENCHMARK1	1024k	450-500
/dev/urandom	/dev/BENCHMARK1	1024k	~45
/dev/BENCHMARK1	/dev/null	1024k	200-250
/dev/zero	/dev/BENCHMARK1	8k	450-500
/dev/BENCHMARK1	/dev/null	8k	200-250

ORION IOPS Baseline

IOPS

ORION Latency Baseline

Latency

average latency

16ms

8000 μ s = 8ms

2ms

4k
8k
16k

Saturation Point
Queue Length ~21

Data Guard Architecture

What is ASYNC vs. SYNC?

ASYNC vs. SYNC

What is NOAFFIRM vs. AFFIRM?

NOAFFIRM vs. AFFIRM

The Who is Who of Data Guard

Data Guard: With and Without

The Old Song of Network Latency

Martin Bach - Swingbench for Oracle Research

<https://dokumen.tips/documents/swingbench-for-oracle-research-doagorg-complicated-queries-against.html?page=43>

Lessons to Learn about Data Guard Performance

- Oracle is efficient.
- Less impact than one might expect.
- I.T. depends! Mostly on the infrastructure.
- Right-size your Standby Machine,
never underestimate IOPS there!
- Nature of load is different on P and S

Morgen um die gleiche Zeit – hier auf der DOAG DB 2022!

HERZLICH WILLKOMMEN

**Making of: Der Preis den wir zahlen –
Performance und HA mit Data Guard**

Axel vom Stein
mit Martin Klier  Performing Databases GmbH

Meet & Greet

martin.klier@performing-db.com

www.performing-databases.com

Many national // international events

Trivadis Performance Days 2022

Efficiency is
to stay in touch!
